SUMMARY

Full Stack Developer with over 9 years of experience in designing, developing, and maintaining web applications, particularly in digital marketing environments. Proficient in WordPress development, including custom theme creation and troubleshooting, ensuring responsive design across devices. Expertise in implementing user experience (UX) and user interface (UI) design elements, building server-side logic, and developing APIs for seamless data integration. Strong advocate for security protocols and database management, with a proven track record of optimizing performance and enhancing user engagement. Committed to collaborative problem-solving and effective communication within remote teams, aligning development with marketing strategies.

SKILLS

Programming Language: HTML, PHP, Javascript/Typescript, Python, Java

Frontend: WordPress, React, Angular, Vue, Tailwind CSS, Bootstrap

Backend: Node.js, ASP.NET Core, Spring Boot, FastAPI

Database: MySQL, PostgreSQL, MongoDB

Cloud: Amazon Web Services, Microsoft Azure

Tools: Git, Docker, Jenkins, Visual Studio, VS Code, Postman

EXPERIENCE

Full Stack Developer

Cognizant • Feb 2023 – Nov 2024 • Philadelphia, PA

- Developed and maintained custom WordPress themes, ensuring a consistent and responsive design across various devices, enhancing user engagement by 30%.

- Implemented user experience (UX) and user interface (UI) design elements, utilizing Figma mockups to deliver pixel-perfect designs.

- Built and maintained scalable APIs for data retrieval and integration with third-party services, optimizing response times by 40% and efficiently handling 1,000+ requests per minute.

- Collaborated with digital marketing teams to integrate third-party tools and platforms, ensuring seamless data flow between systems.

- Implemented security protocols to protect sensitive data and user information, enhancing application security by 30%.

Full Stack Developer

VironIT • Jul 2018 – Jan 2023 • Philadelphia, PA

- Developed dynamic applications using WordPress, React.js, and Angular, improving performance by 20% and ensuring website troubleshooting capabilities.

- Engineered robust backend systems with Node.js and Spring Boot, increasing system reliability by 30% and optimizing database performance.

- Designed and maintained databases, ensuring data integrity and reliability while streamlining GraphQL queries for efficient data retrieval.

- Achieved 90% code coverage through automated testing, maintaining comprehensive documentation for code and systems.

Frontend Developer

United By Blue • Jun 2016 – May 2018 • Philadelphia, PA

- Developed and maintained interactive web applications using React.js and Angular, enhancing user experience through responsive design and front-end optimization.

- Resolved critical front-end bugs, improving system stability by 35% and collaborating with designers to align development with marketing strategies.

Frontend Developer

Spreadknowledge • Jul 2014– May 2016 • Jenkintown, PA

- Built performant applications using React.js and Restful API, enhancing performance by 25% and implementing JWT-based authentication for improved security.

- Improved user satisfaction by 25% through optimized UI/UX design and dynamic content loading, effectively communicating technical concepts to non-technical team members.

EDUCATION

Bachelor's Degree in Computer Science

Indiana University of Pennsylvania • Indiana, PA • 2014
